Training Announcement

Pharmaceutical and Street Drugs

Tennessee P.O.S.T. Approved
RESTRICTED TO LAW ENFORCEMENT AND CORRECTIONS

DeMuro Enterprises, LLC

Since old and new drugs of abuse continually impact our nation, it is important for Law Enforcement Officers to know what they are dealing with when enforcing drug law. This training has been designed to expand on the traditional ‘Narcotics Identification’ training, and has been developed to provide both the road Officer and experienced Drug Investigator with a level of improved awareness of both the old and new drugs of abuse that they will frequently encounter when engaged in drug enforcement efforts and other police-citizen encounters. With special focus on Tennessee’s drugs and drug law, this class will also provide a variety of innovative techniques that can be used to control and decrease the abuse and sale of drugs in any community.

TOPICS INCLUDE:

● A review and examination of controlled, pharmaceutical, and over-the-counter substances, to include inhalants, bath salts, spice and other commonly encountered and frequently abused materials.
● An analysis of several investigative techniques for the application of proactive drug law enforcement.
● A targeted examination of some legal concerns that can impact proactive drug control operations.
● A look at the variety of criminal groups that are found to commonly engage in –and profit from- the sale of illicit substances.

Presented by an instructor with over a decade of specific investigative work on traditional drug and undercover investigations; working at the municipal, county, state and federal levels. He has also been used as a Subject Matter Expert for Drug Investigations. Having worked on and supervised several local, state and federal task forces, he has provided training on Drug Investigation and Identification for over 20 years.
